

Powered Beach Chair

Completely eliminates manual positioning with push-button ease

NEW! Double Ball Joint Head System allows complete control of the patient's head with one knob. Multiple articulating joints allow the head positioner to safely and efficiently control the most challenging patient anatomies, even super kyphosis patients.

Lateral counter-traction brace adjusts to secure patient positioning.

Head system slides vertically and then locks tight.

Patented

Powered Beach Chair

- 500 lb (227 kg) patient weight capacity
- Motion-control technology eliminates manual patient positioning
- Lateral Brace attaches to chair and not table side rail
- Pull-away panels providing excellent surgical exposure
- Double-ball joint head rest tilts 30° in every direction
- Five-piece Deluxe pad set included

Powered Beach Chair is the only chair on the market with a self-contained motor that does not have to rely on the surgical table for power. The double-ball joint head system safely secures patient's head; with even your kyphosis patients. Chair adjusts from 0-90° in 8 seconds in a slow controlled movement. 2" (5cm) Deluxe pad set provides patient comfort. Motion-control technology eliminates manual patient positioning with a simple push button hand control and supports patients up to 500 lbs (227 kgs). Attaches to ANY operating room table with our integrated adjustable mounting clamps. Lateral Brace included.
